

Allied Professionals Forum 2013

The 2013 Allied Professionals Forum presentations are available for viewing on the International Alliance of ALS/MND Associations YouTube Channel

The Allied Professionals Forum (APF) is a fantastic opportunity for those working at the 'coalface' to report on their practice and to share initiatives that help improve the care and support of people living with MND. The 2013 APF featured 17 presentations from six countries, and covered a range of topics including non-invasive ventilation (NIV), PEG, burnout, practice guidelines and supporting young carers.
